---

## Education

- **Providence Academy**                                              2018
  Matric
  34 APS score

- **Tswane University of Technology**                                 2022
  Diploma in Financial information systems

- **Wethinkcode_**                                                    2023
  Software Development

- **IBM**                                                            2024
  SQL and Relational Database 101
  90%

---

## Skills

- Programming Languages: - Python, Java, Javascript, SQL

- Web Development: - HTML, CSS, React, Node.js, Flask

- Software Development: Object-oriented Programming (OOP), Agile and Scrum Methodologies, Test-Driven Development (TDD), Client-Server Architecture Systems, Network Programming, Multi threading and Concurrency

- Tools and Technologies: Git, Docker, Restful APIs, SQL database, Figma (UI/UX Design), JSON (Data Interchange Format), Linux Platform (Development and Administration)

- Accounting Knowledge: Understanding financial statements (balance sheets, income statements and cash flow statements)

- Additional Skills: Problem-solving and algorithm development, Debugging and code review, Collaboration and teamwork, Effective communication

---

## Projects

- **AgrWeather Advisor**
  AgrWeather Advisor is an innovative web application designed to provide real-time weather updates and tailored agricultural advice based on current weather conditions in your city.
  Leveraging Python, a reliable weather API, Flask for backend development and HTML /CSS for front-end design,
  AgrWeather Advisor offers a seamless user experience. Users simply enter their city, and the application delivers up-to-date weather information along with expert recommendations on crops and plants for the prevailing weather conditions.

- **Secret Softwear Website**
  Developed a front-end functional e-commerce website using React.
  Implemented features such as product listing, shopping cart.

- **Mukuru & WeThinkCode_ Hackathon**
  Developed an website that addresses a Pay-in and Pay-out Location Finder.
  Led API integration and implemented a responsive, user-friendly design.
  Focused on ensuring seamless error handling and optimized performance across devices.

## Achievements & Awards

- Mukuru and WeThinkCode_ Hackathon Front-End Developer and UI/UX Design Collaborated in a team to build a User-Friendly Pay-in and Pay-out Location Finder in a fast-paced, high-pressure environment. Played a key role in integration APIs and designing the user interface, contributing to the team's success as 1st runner-up.
